Topic 1

The Internet has brought many benefits to human life, but it also created many problems. *In Your opinion, what are the most serious ssociated with Internet and your solutions?*

Nowadays the Internet has become a great source for people to find information. While some people believe it is a useful tool to collect information, they also have difficulties in confirming dependable data. This essay will describe the most drawback of using Internet in finding reliable information.

Collecting information on the Internet has several drawbacks especially accessing reliable data. Obviously, not all information is accurate because anyone can post information online without being verified. For example, people can freely edit information on Wiki website. When we find out the information, we may get the wrong knowledge. It might lead to the problem of passing information and knowledge to others.

In conclusion, it is undeniable that the Internet is a great source of information because of its instant access rich information and low cost. However, while searching information online, people might not find reliable information. To resolve the problem, we should consider to find out the information from the dependable resources that are confirmed by the government.

Topic 2

Today, many people prefer going on holiday by motorbike to going by cars or planes. What are the advantages of this trend? Use specific and examples in your answer.

It is a fact that going on holiday by motorbike is a new trend with young people nowadays. This essay will analyze why I believe that inconveniences of this trend are not outweigh by its merits.

On the one hand, going on holiday by motorbike brings some drawbacks. First, motorbikes are the cause of many accidents today. Second, travelling by the motorbike is also potentially dangerous because the driver will be tired and exhausted during for long-distance driving

On the other hand, in spite of downsides given above, I believe that the benefits are more significant. The first reason is that, the cost of a motorcycle trip is also cheaper than other forms. In fact, we spend less gas as well as fee from parking than other transportations. Furthermore, we can be completely proactive about our time and schedule. One way of explaining this is that we can take a rest whenever we want or we can stop wherever we like.

In conclusion, I believe that motorcycles are the first choice for those who love travelling and want to have exciting adventure experience.

Topic 3

Machines are helping people in many aspects of life. Do you agree that machines will replace humans in the future of work? Use specific details and examples in your answer.

People have different views about technology development with regard to robots. More and more robots are used in various fields, especially in some areas that dangerous for humans. Many people hold opinion that robots will replace humans in the future. In my personal view, I strongly disagree because of some following reasons.

There are various reasons to believe that robots can't do many of the jobs that humans do today because robots only repeat the same task all the time and have no ability to think. Besides, robots can do things rapidly depending on the program in software, they can not do complex jobs that require skills and mentality. For example, Toyota, a famous car company, has embraced automation and replaced human with robots for years, but robots just only used in simple automatic tasks. The company still need staff who have skills that can understand the whole production line. And hand on all the process that robots can't do.

In conclusion, I think humans will not be replaced by robots in the future. Most jobs in the world like teaching depend on personal experience. It is difficult for robots to make judgments. Humans have more skills that are not limited to a few areas
